

FLOOR CLOTH KOMBI PERFECT

FLOOR CLOTH KOMBI PERFEKT

Floor cloth KOMBI PERFEKT by Tüchler is the perfect solution for technical directors of theatre, opera, stage designers, stage masters, stage painters and theatre painters who want to quickly and easily transform a stage floor into a uniform surface. The cloth is made of 100% cotton and has a non-slip back coating that is PVC-free and has been flame retardant. The colors black and white are available and the cloth can be individually digitally printed.

The floor cloth is not rubberized, which makes it easy to sew and very easy to position on stage. The non-slip back coating runs from edge to edge, which allows the tracks to be connected by means of a flat tarpaulin seam and allows stage wagons and backdrops to roll easily and evenly on the floor cloth.

With the gecko effect of the back coating, the cloth adheres non-slip to the floor and cannot slip under load, even on stage slopes. Even when loaded with swivel castors, the KOMBI PERFEKT floor cloth remains perfectly flat. The edges are simply glued down with gaffer tape - tacking or tensioning is not necessary as well as reinforcement of the floor cloth edges!

With KOMBI-PERFEKT floor cloth, they move an average of only 1/3 to half the weight of a dance surface, and with digital prints they do not have to align and glue strips together. In addition, her stage floor is matt and free of light reflections, which makes life easy for her lighting team.

If the cloth is to be removed again, an air cushion can simply be inserted under the cloth to loosen it immediately and without leaving any residue. The KOMBI PERFEKT floor cloth is the fastest and easiest way to transform a stage floor into a uniform black, white, painted or digitally designed surface. The 4-corner-4-people principle applies! Simply pull it up, swivel it in, spool it, position it, sweep air out from the center, and you're done! If you want, you can fix the edges in places or all around using gaffer tape.

1: Black
2: White

•Details:

- Flame-retardant;EN 13501-1, Bfl-s1; EN13773-C1,ÖNORM B1,Q1,TR1
- KM2 (123-FZ RF)
- 100% cotton
- width 200 cm
- 700 g/m²
- appr. 50lm rolls
